THE AGENCY ADVENTURE

Creating
Agencies
of the Future

The
**Agency
Adventure.**

Do you know what you don't know?

We recognise that every agency owner's journey is different. The Agency Adventure provides business and commercial support to independent Agency owners to create sustainable, profitable and remarkable agencies, no matter what your goals are.

We want you to run a better agency – whatever that looks like for you. For some, it's about increasing profits, or having a business that runs without them; for others, it's about finding more time to spend with their family.

Providing an outside perspective combined with inside knowledge. All our Guides (Agency Advisors) have run, grown and most importantly sold agencies, so can provide the insider knowledge to help you on your journey.

We're here to help agency owners like you deal with the bits of running a business you probably never signed up for – things like cash flow, business development, and all the operational stuff that's essential but often gets overlooked.

We're by your side, on your side and there to pick you up when you stumble.

We've built a framework to help agencies become profitable, sustainable and remarkable. It's all about helping owners get back to what they love while making sure the business works for them, not the other way around.

The advice we give isn't cookie-cutter, it's not a programme, it is tailored to helping you.

A big part of what we do is addressing the human side of running an agency. Sure, we can talk about cash flow and strategy, but often, it's helping people get past whatever mental block is holding them back – fear, ego or just not knowing where to start.

It all starts with a discussion.

If any of this resonates with you then please get in touch and we can explore your challenges.

The Great Pitch Company's purpose is to help agencies achieve profitable business growth through driving up win rates and driving down wasted resources.

UNIFIDA

THE KEY TO PROVING THE

MARKETING

TRUE VALUE OF MARKETING

ATTRIBUTION

PIMENTO MEMBER OFFER:

Our offer to you and your clients:

- Go to www.unifida.co.uk where you can download a FREE COPY of our
- ebook on marketing attribution
- And if your client wants it, we can provide a free audit of all their current sources of marketing attribution reporting, and a gap analysis in terms of what's needed to give them a single view of the truth about their marketing's performance

Why marketing attribution matters

It's estimated that the average customer uses up to 10 different channels to communicate with companies. Customers seamlessly move between digital and offline channels, often browsing on one and buying on another.

No wonder it can be difficult to know exactly where or how to focus marketing efforts – or even where to start.

UniFida's AI-driven marketing mix attribution provides organisations with timely, accurate, granular and independent reporting on all marketing investments.

We consider all direct channels, like social media, and all indirect channels, like TV or Press, as well as online and offline touchpoints.

With UniFida, your clients can finally have a clear understanding of their customer journeys and the impact of each marketing channel on their bottom line. You can leverage data insights and quickly identify how and where to allocate their resources and budgets.

Rather than spending time and resources on ineffective marketing tactics, you can focus on the channels and strategies that are actually driving conversions and sales. That means a potential increased ROMI for your clients and a more tailored brand experience for their customers.

How UniFida can service your agency's attribution requirements:

- We are independent of all media owners and our solution is totally transparent, so no black box reporting!
- We can be white labelled, or we can work as a partner alongside your agency
- We can share a trade pricelist with you, which you can mark up as you decide

E: tf@tinafegent.com | T: 07970 472 211 | www.tinafegent.com

One of the first to work in Marketing Procurement over 25 years ago. I established many of the first Marketing Procurement teams in the UK for Cellnet (Telefonica), SB (GSK) and Orange & France Telecom. From Lucozade Sports bottles to Orange Arrows Formula One Racing, there isn't a category of marketing that I haven't procured.

I was the first Procurement person to work agency side at Grey Advertising as their Commercial Director. I then did the same role at Lowe Advertising. An experience that taught me how agencies work commercially. In 2006 I set up Tina Fegent Consulting to offer a Marketing Procurement Consultancy service to clients.

I manage and work alongside clients and agencies, working at a strategic level to help identify what is required to make marketing procurement a success in an organisation. Market knowledge and stakeholder engagement being some of my key attributes.

The services that I offer to agencies fall into three buckets:

- 1. Consult** – Support in a tender process; Review of client contracts; Negotiation support when facing client procurement; Development of a strategy for managing client procurement; Build a plan for identifying, selling and engaging with client procurement; Design and the chairing of agency branded events for client procurement; Audit of existing client procurement relationships and identification of areas to improve on (6 monthly programme).
- 2. Benchmark** – Benchmarking of Fees; Remuneration Models; Production costs and Contract terms against the marketplace and competitors.
- 3. Training and Mentoring** – Training on Marketing Procurement and Negotiation. Coaching and Mentoring for individuals and teams on how to work successfully with Marketing Procurement.

Nearbound.

Whether it's loose referrals from clients, leads from partners or internal introductions, your agency has almost certainly been built on this. And that should be celebrated. You've grown based on your reputation.

But now you're feeling sketchy about scaling that.

Referrals – if they're led by you they can't be scaled.

Partnerships – you've tried to make sense of them but it's just not quite working.

Or maybe they're doing ok, but it still feels like the next step is the one too far.

Better to outsource your lead gen externally – even if you know deep down it won't work.

We're here to give you another option. Nearbound tactics that rely on nurture not nature, and move the organic to dependable and scalable, whilst still remaining completely human.

From supporting everyone customer facing in your agency to be a new business superstar in a way they feel both comfortable with and excited about, to putting process behind the attraction, activation and nurturing of strategic partnerships that consistently deliver ideal clients, at the ideal time to buy – we're here to help.

And we get results.

Referrals happen anyway. But much like design, copywriting, accountancy, legal, anything else your business relies on, expert help means the results follow.

Get in touch and I'll give you waaaaay too much insight on an intro call than is commercially sound.

Blutui® has been described as a “Time Machine for Agencies” by Sydney-based agency COO Rakz Mathur, and R/GA Singapore has this to say “Blutui ‘Saved Our Bacon’ on the Chicken Account”.

Blutui has developed a universal platform approach to building and deploying projects, everything from microsites to campaign sites to web and mobile applications, at pace and scale.

Built by agency insiders to solve industry-wide issues, Blutui offers automation, AI enhanced workflows and front-end dev focussed tools to improve productivity by 400% and optimise talent by a 66%. “The result is **lower overheads, improved delivery cadence, capacity and scalability**, resulting in **more available margin**”, says Amir Mireskandari, ex digital delivery chief for Ogilvy SG, now CEO of Method+Motion.

“The team at Blutui solved their own agency issues with Blutui and now focus entirely on putting their platform to work for agencies around the world”, says Amir.

Blutui is also agency white label, with individual client projects delivered in their own branded back end. This is designed to improve the perceived value of each project. We call this Chameleon which clients and their content management teams love.

Our ‘bottomless cup’ approach to features means you’ll enjoy every new feature as they are rolled out, now and forever.

Stop missing out on available margin, richer relationships, efficiency and control, talk to one of our super friendly Blutui Agency team today.
